

JDN NEWSLETTER NO. 100

01/2011

In this Edition:

- JDN Energy Feedings
- JDN Trade Fairs 2011

JDN Energy Feedings

For the air supply of JDN Air Hoists in trolleys, monorail hoists and cranes, various energy feeding systems are available:

- Spiral hose
- Hose trolleys
- Square or C-shaped rail
- Energy chain

Today we introduce the spiral hose.

This simple and economic solution is suitable for travel distances up to 10 m. The hose rings hang on a plastic covered wire rope, tightened parallel to the beam.

The spiral hose can be used in category 3 (zone 2) with gases of explosion groups IIA and IIB. It is not for use in category 2 (zone 1) or group IIC applications.

Practice tip:

Install the hose in such a manner that its fully extended length corresponds to one and a half times the required travel distance.

JDN Trade Fairs 2011

	Arctic Technology Conference 7 – 9 February Houston, Texas
	Australasian Oil & Gas 23 – 25 February Perth, Australia
