“He who lives by the crystal ball soon learns to eat ground glass.”
Edgar R. Fiedler

“High achievement always take place in the framework of high expectation.”
Charles Kettering

J.D. Neuhaus EH20 Spark Proof Monorail Air Hoist in Test Stand

EH-20 Spark Resistant Monorail Hoist In Test Stand

J.D. Neuhaus in Sparks, Maryland has load test capabilities on site. A recent order for an EH-20, 20 ton monorail air hoist with spark resistant features for an offshore application required an independent third party load test certification prior to export.

Above are photos of the unit in the test stand ready for inspection and load test.

J.D. Neuhaus is ready to meet your special requirements—for hoist, applications, test and certification. To view the features, options and specs on the J.D. Neuhaus Monorail Air Hoist go to:

JDN MANUFACTURING PLANT RECEIVED ISO 14001 CERTIFICATION

J.D. Neuhaus GmbH & Co. KG (JDN) has been certified for their comprehensive Environmental Management System according to the international Environmental Standard ISO 14001 by the TÜV Rheinland.

At the Witten Germany location, 140 employees produce hoists, winches and crane systems which are driven by compressed air or hydraulic fluids. The global development – the share of exports has been increased to 70% - is supported by daughter companies in the USA, Great Britain, France, Singapore and China.

Demand for JDN products is particularly high in the oil and gas exploration and processing sectors, in mining, the chemical industry and heavy plant construction.

Environmentally conscious management has been a fundamental component of the corporate policy at J.D. Neuhaus all times. Starting with the development and production of the products, JDN places great value on ecological compatibility. Long service life and recyclability already make an important contribution towards relieving the environmental burden.

In addition JDN Products can be oil-free operated due to the self-lubricating motor. That results in zero lubricant emission. Sound pressure levels and air consumptions will be minimized continuously.

Furthermore the JDN production facilities have been adapted to minimize energy consumption, emissions, sewage and waste. Environmentally friendly production processes and materials are also employed.

One of the most important commitments of the J.D. Neuhaus management is to promote awareness, openness and a sense of responsibility among employees in order to establish conditions favorable to the implementation of the environmental guidelines.

Together with the certification of the Environmental Management System the JDN Quality Management System acc. to ISO 9001 has been recertified by the TÜV Rheinland.
